

Students are asked to submit a poster with the topic given in the lab.

Perform it according to the following criteria:

- The Poster should start with a collective summarized **introduction** about the Disease, then each student will put the following information about his/her plant:
 1. **Origin of the chosen plant (including part used, genus, species, family, English and Arabic name).**
 2. **Picture of the organ used from the plant (with the highest content of the main active constituent).**
 3. **Active constituents (provide the structure of the main active constituents).**
 4. **Uses of the plant (with pictures as possible).**
 5. **The mechanism of action of the main active constituent (summarized).**
 6. **Picture of the pharmaceutical preparation from the Egyptian or the international market that include the whole plant, an extract, or a compound from this plant.**

After revising the poster, submission of the poster will be performed by only **one student** among the group.

*****Make sure that the fonts are clear, student names, ID, Course name, Code, and Course Coordinator are written under the title,- MSA and Greenwich logo is included- and all the used references are included. In addition to the SDG logo:

- References are written in numerical style.
- The poster dimensions is **A3** with white background.
- The font is Times New Roman.
- It should be submitted as **Pdf** file.
- Font Size (**Title 60, Heading 24** and **Text 20**)
- All the information should be clear, summarized and to the point with the addition of illustration as much as possible.
- The deadline for submission is **Saturday 7/12/2024 11:55 pm**
- Discussion will be on **Saturday 14/12/2024 and Saturday 21/12/2024.**

*****The five best posters will have bonus marks and will be asked to present their posters in the department scientific day.
