

Pharmacognosy

PHG 112 PG 102

Professor Mahitab Helmy Associate Professor Dr Soumaya Saad Zaghloul Dr Ibrahim Ezz

Spring 2025

By the end of the lecture, students should be able to demonstrate knowledge of:

- Examples of seeds used as nutraceuticals & cosmeceuticals
- <u>Linseed</u>

The morphological & microscopical structure of linseed

- -The chemical constituents & uses of linseed
- -<u>Fœnugreek</u>
- -The morphological & microscopical structure of Fœnugreek
- -The chemical constituents, tests & uses of Fœnugreek
- -Strophanthus

The chemical constituents , test & uses of Strophanthus

-Psyllium seed

The chemical constituents, test & uses of Psyllium seed

LINSEED

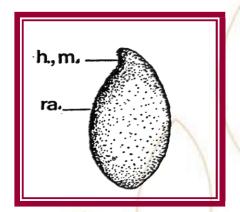

Flax Seed-Semen Lini

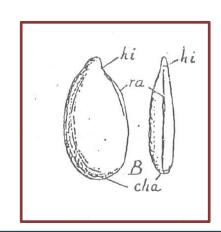

The dried ripe seeds of

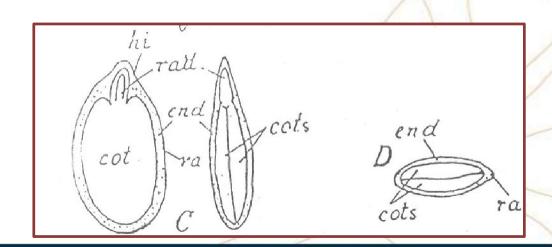

Linum usitatissimum Linne family Linaceae.

-Linseed yields not less than 30% of fixed oil

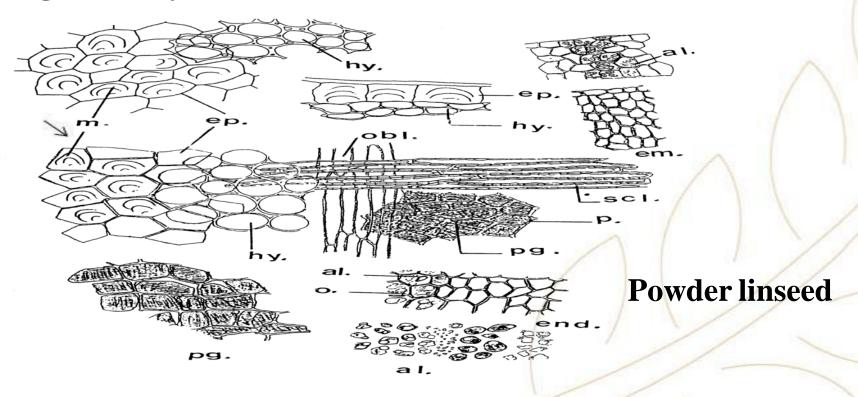

Powder

Colour: Yellowish-brown with readily reddish-brown fragments of the testa

Odour: It has a characteristic odor

Taste: Mucilaginous oily.

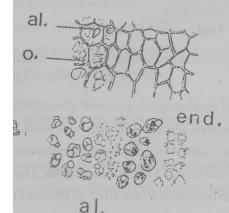

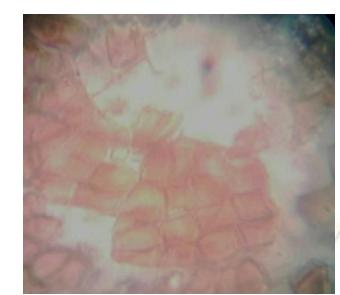

Microscopically, it is characterized by:

1.Dark brown fragments showing pigment cells (Polygonal flattened cells with pitted walls and reddish-brown contents)

cotyledons

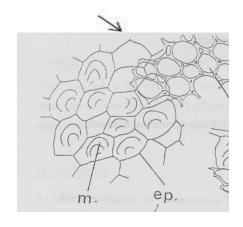

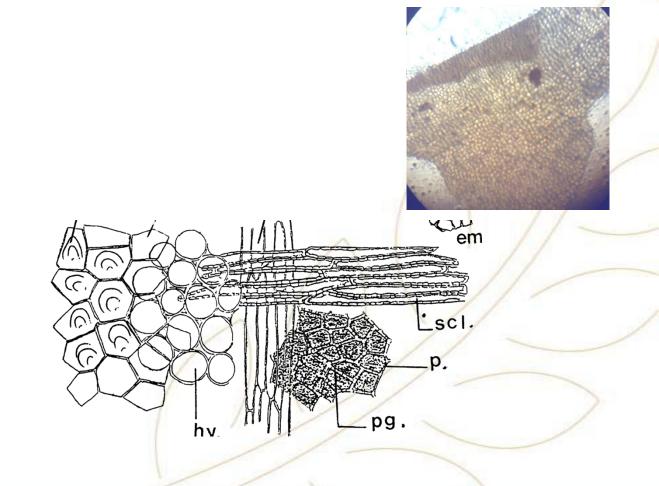

Endosperm

3. Fragments of yellowish-brown sclerenchymatous cells (appearing crossed by thin-walled elongated cells on one side and by rounded somewhat thickened parenchyma on the other and accompanied by pigment layer.)

4. Mucilaginous epidermis.

Epidermis with mucilage

Active Constituents

Small amount of a cyanogenic glycoside (linamarin).

30 to 40% of fixed oil containing high contents of the unsaturated fatty acids: oleic acid (39%), linoleic acid (15%) and α -linolenic acid (essential fatty acids that can not be manufactured by mammals and must be consumed as part of diet).

- -25% protein.
- **3-6% mucilage**

Internally

1-Linseed is used in patients with rheumatoid arthritis and psoriasis.

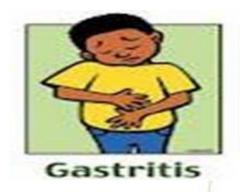

Rheumatoid arthritis

Psoriasis.

2-Demulcent in acute or chronic gastritis (mucilage)

3-Bulk laxative in habitual constipation, due to its mucilage & fixed oil which have a lubricant effect. The laxative action arises from an increase in the volume of the intestinal bowel contents and consequent reflex stimulation of peristalsis.

4-Anti-inflammatory (Omega-3 fatty acids have demonstrated effect due to reduced production of inflammatory mediators).

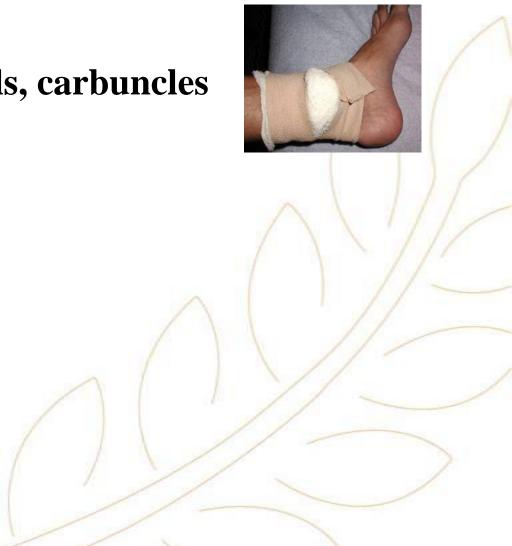

5- Heart protecting against angina pectoris, since Omega-3 fatty acids reduce the whole blood viscosity & lowers the cholesterol level.

Externally

Used as an emollient in poultices for boils, carbuncles and other skin infections.

Cosmeceutical Applications

-Use of linseed for hair

There are several ways to take care of your hair by using linseed:

- -A mask: <u>seeds</u> are immersed for about 10 minutes, the mask should take the form of a jelly or gel
- -<u>Linseed oil is</u> applied to the scalp and entire strands of hair.

It helps strengthen hair follicles, promote healthy hair growth, and reduce issues like hair breakage and thinning.

Side effects

•When taken internally, linseed must be accompanied by plenty of fluids, otherwise flatulence may occur.

Contraindications

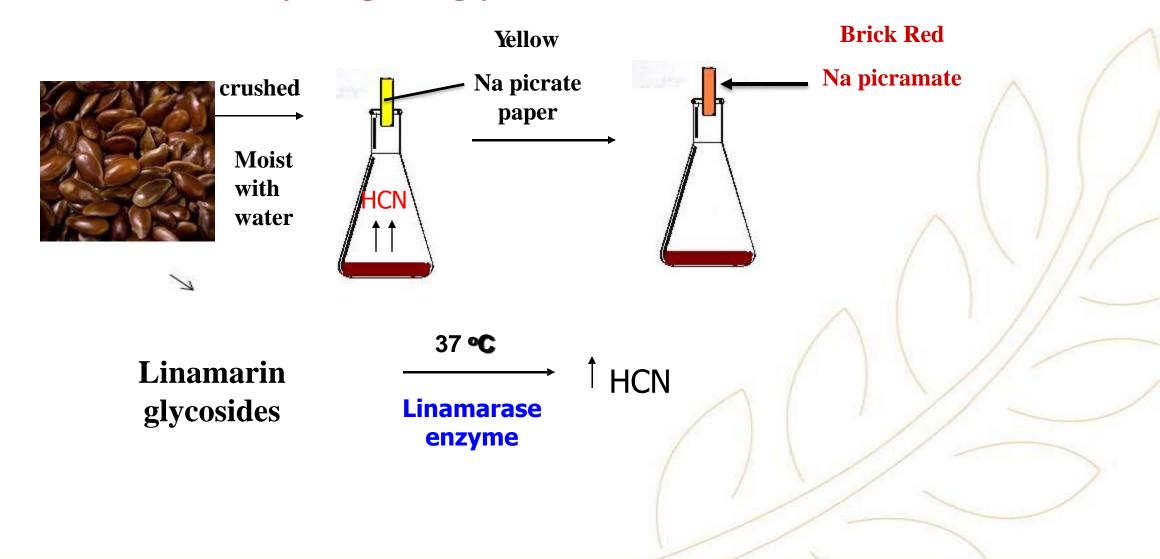

•The drug is contraindicated in case of intestinal obstruction.

Why linseed is not toxic

- Toxic effects arising from the liberation of HCN from the cyanogenic glycoside (Iinamarin) by the enzyme linamarase.
- 1 When crushed seeds are taken internally, linamarase is partly inactivated under the influence of the acidity of the stomach and less than 1% of the cyanogenic glycoside is hydrolyzed.
- 2 Hydrolysis time of four hours is required in vivo system.
- 3 The majority of HCN, liberated is converted rapidly into the relatively non toxic thiocyanate through a detoxification mechanism in the body.
- 4 The minor part of HCN remained is eliminated via the urine and the feces.

Chemical tests:

1-General test for cyanogenic glycoside (Guignard's paper test):

Chemical tests (cont.)

2 For Mucilage:

Red colour with Ruthenium Red

3 For Fixed oil:

Red colour with sudan lll

4 For Proteins:

Millon's reagent: red

FŒNUGREEK بذر الحلبة

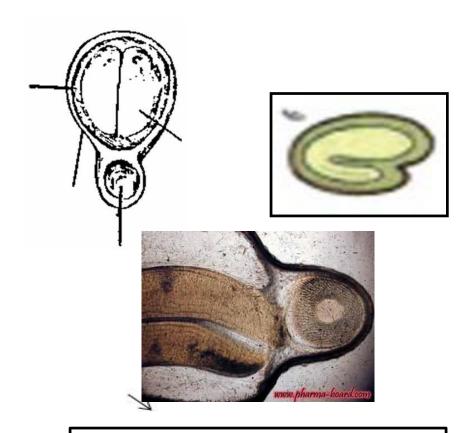

• Semen Fænugreek

• The dried ripe seeds of

Trigonella foenum-graecum Linne
Family Leguminosae.

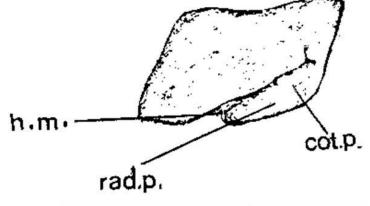

Contains not more than 2 % of foreign organic matter.

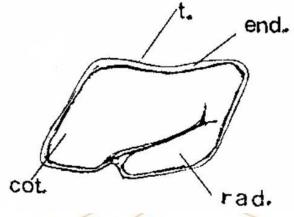

Accumbent embryo

Albuminous seed

Powder

Yellowish in colour, with strong characteristic odour and a mucilaginous slightly bitter taste.

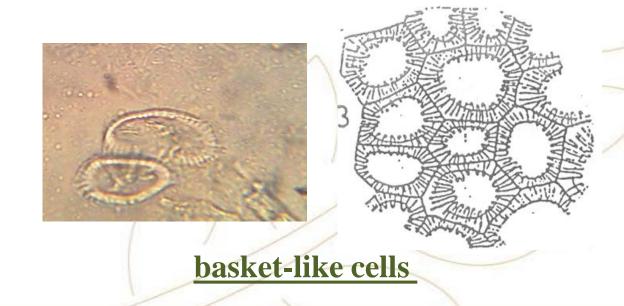

It is characterized by:

1. Fragments of testa showing the <u>palisade like epidermal cells</u>, the <u>basket-like cells</u> of the sub-epidermal layer.

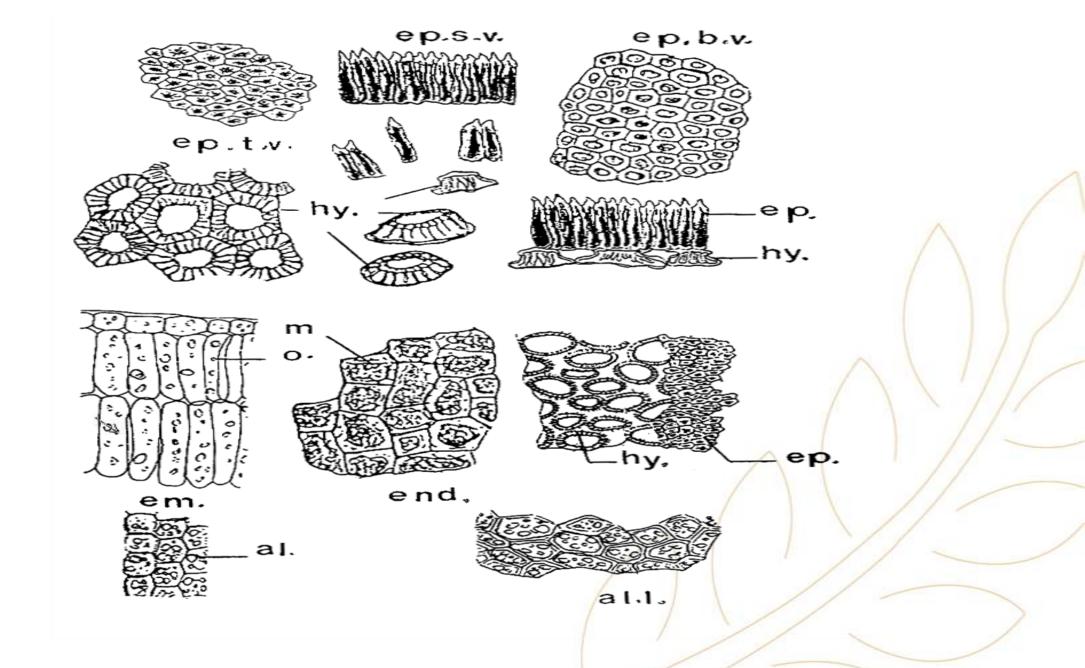

palisade like epidermal cells

2. Fragments of endosperm with mucilaginous cells.

3. Fragments of the <u>cotyledons</u> containing fixed oil and aleurone grains.

4. Very few small starch granules.

Active Constituents

28 % of Mucilage

Alkaloids:
Gentianine
trigonelline &
choline

23-25% Proteins & amino acids.

Flavonoids
Apigenin, luteolin, vitexin & quercetin.

Saponins glycosides

Steroidal sapogenin, 0.6-1.7 % gitogenin,

Coumarin (5-8 %)

7

Vitamins
(nicotinic acid) &
minerals (a rich
source of
selenium).

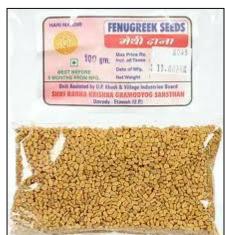

Volatile
constituents
responsible for
the flavor of
Fænugreek.

Fœnugreek Preparation

Nutraceutical

Cosmeceutical

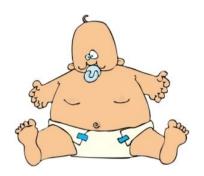

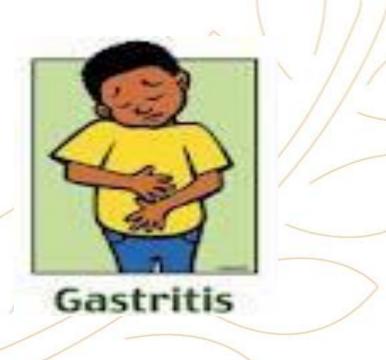

Medicinal Uses and actions

1-Hypoglycemic in diabetic patients.

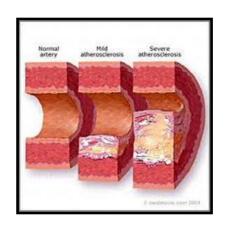

2- Lactagogue.

3-Treatment of dyspepsia & gastritis

4-Hypocholesterolemic actions in normal and diabetic humans.

atherosclerosis

5- It has demulcent, laxative and nutritive properties.

6-Topically for wounds, leg ulcers & to reduce inflammation

Side effects and/or toxicity

• 1-Repeated external applications can result in undesirable skin reactions.

• 2-Minor gastrointestinal symptoms, such as diarrhea and flatulence.

Contraindications

- 1-The hypoglycemic activity of fœnugreek may interfere with an existing hypoglycemic therapy.
- 2-Oxytoxic and uterine stimulant activity ,the use of fœnugreek during pregnancy and lactation in doses greatly exceeding those normally encountered in foods is not advisable.

Cosmeceutical

• It helps strengthen hair follicles, promote healthy hair growth, and reduce issues like hair breakage and thinning.

• **Skin rejuvenation**: Incorporate fenugreek oil into your skincare routine to revitalize and rejuvenate your skin.

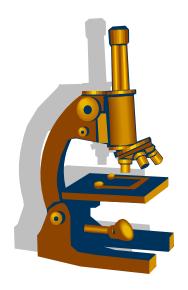

• <u>Anti-collagenase</u> activity and increased collagen production anti-aging remedy

• It helps moisturize, soothe inflammation.

Chemical tests

- It gives positive histochemical tests with sudan III and methylene blue
- Positive test for saponin (Froth test)

STROPHANTHUS

بذور الاستروفانس

 Strophanthus is the dried ripe seeds of Strophanthus kombe',

S. hispidus & S. gratus

Family Apocynaceae deprived

of their awns.

Active Constituents

8 – 10% of a mixture of cardiac glycosides

K – strophanthin &

K - strophanthoside

4 - 8 % of <u>ouabain</u> (G - strophanthin)

Alkaloids:
trigonelline &
choline

Kombic acid

Uses and actions

1- Cardiac stimulant and cardiotonic

2-It controls the blood pressure

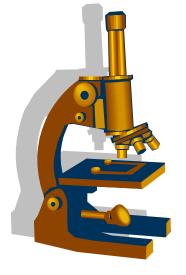

3- Efficient diuretic.

In certain cases is <u>used as substituent for digitalis</u>:

It is <u>not cumulative</u> and <u>less liable than</u>

<u>digitalis to produce gastric& intestinal irritation</u>.

Chemical test

Mount a section of Strophanthus in sulphuric acid (66 % v/v).

The endosperm acquires a green colour

The embryo acquires a Green in S. kombe or

Reddish brown colour in S. hispidus (Strophanthin glycoside) or

Red colour in S. gratus (Ouabain)

Effect of 66% sulphuric acid

	S. Kombe	S. hispidus	S.gratus
The endosperm	Green	Green	Green
The embryo	Green	Reddish brown	Red
The glycoside	K- strophanthin	H- strophanthin	Ouabain

PSYLLIUM SEED

The dried ripe seeds of *Plantago psyllium* and *Plantago albicans*, F. Plantaginaceae.

Active constituents:

- <u>1-Acidic mucilage</u> (10 12 %)
- 2- Small amount of glycosides.
- 3- Fixed oil protein.

•Uses:

1-Bulk laxative
(alone or associated with
other purgatives as: Senna &
Cascara) especially during pregnancy

2-Promising in lowering cholesterol and controlling diabetes.

• Psyllium husk:

• Psyllium seed husk are indigestible and are a source of soluble <u>dietary</u> <u>fibres</u>.

- The seeds are placed in water, the seed coat swells (the epidermal cells) forming layers of mucilage around the seed which are peeled & left to dry.
- It is then purified and used as laxative (in chronic constipation).

Contraindications

• The indigestible fiber in psyllium seed can cause **flatulence** and abdominal discomfort.

• If psyllium seed is not taken with adequate water, it can clump together in a mass and **block the digestive tract.**

Sufficient fluid is essential to the safe and successful use of psyllium seed.

HOME WORK

1- Enumerate scars on the surface of the seed	
2-What is meant by: albuminous seed, exalbuminous seed, kernel	
3-Complete the following statements:	
a- Linseed is an example ofseed	
b- Linseed is not toxic because,	
c- Linseed is tested by	
d- Active constituents in Linseed are,	
e- Linseed is used,,,	
a- Foenugreek is an example ofseed	
b- Foenugreek is used for,,	
c- Foenugreek is tested by	
d- Active constituents in Foenugreek are,	1
e- Strophanthus is used,	
f-Strophanthus is tested by	
g- Psyllium husk is defined as	1
